Hi Dean:

Attached is the data that I had requested from Wisconsin DATCP.

Sincerely,

Cheryl Burdett

Cheryl, we do have a monitoring well nest in Armenia Twp. The three wells (BR046, 047 and 048) are all located in one spot, but are screened at successively deeper 5-foot intervals so that we have the ability to collect a water table sample depending on the water depth on the day of sampling. In some cases, you'll see that we have collected samples from two or more of the wells at this location on one sample date. This is for differing program objectives.

We also provided the private well data from Armenia (Juneau Co.) and Port Edwards (Wood Co.) Townships. Let us know if this does not provide the coverage you were expecting.

I received your map this morning. Thank you.

I included the latitude and longitude coordinates in addition to the PLSS info in the spreadsheets. It should be noted that not all of the coordinates were collected with GPS. This would especially be true with the older samples. Those coordinates are based on the center point of the quarter-quarter section. The monitoring wells were located with GPS but are the coordinates all the same since all the wells are next to each other, but drilled to different depths.
